

Milestone Summary Guide

With MS2, MS3 and MS4 you commit `docs/ms<n>_summary.pdf` (max. 2 pages) before 23:59 of the deadline. Reviewers read it before your code. Graded as its own criterion "Summary & Response to Reviews".

A checklist for your own document, not a form to fill in. Deadlines and weights: see the project slides.

YOUR DOCUMENT

MS<n> Summary — <project title>

Two sections, both required.

1 What I achieved in this milestone

- ☐ Bullets in your own words.
- ☐ What works now that did not before?
- ☐ Key decisions, and why.
- ☐ What should a reviewer look at first (files, dashboards, endpoints)?
- ☐ Be honest about what cost you (rows, accuracy, a rewrite).
- ☐ MS4: what changed since MS3.

2 Response to MS<n-1> reviews

- ☐ Answer every distinct point from both reviews and the editorial summary.
- ☐ One numbered entry per point: A1, A2 ... (Reviewer A), B1 ... (Reviewer B), E1 ... (editors).
- ☐ Same point from both reviewers: answer once, name both labels.
- ☐ Status for each: Changed / Partly / Rejected / Not yet.
- ☐ Point to the commit or file for anything you changed.
- ☐ A reasoned rebuttal is fine; silence costs marks.

EXAMPLE A1 · No backfill script — Changed (a3f9c21), also B2 · Added scripts/backfill.py, tested back to 2024-01.

FORMAT

- max. 2 pages
- PDF
- `docs/ms2_summary.pdf` / `ms3` / `ms4`
- committed before the deadline (we grade the last commit before 23:59)

COMMON MISTAKES

- points skipped
- "fixed" without commit or file
- summary copied from the README
- response to only one reviewer
